Apparel Retailer Saves \$154,000 in Store Transfer Costs!

Business Challenge: In the former process, store transfer details were downloaded to the store PC and printed on a laser printer. Items were retrieved from the sales floor and scanned through the point of sale. Items were walked to the back room and scanned again with a handheld scanner. The handheld scanner files were uploaded and a barcoded transfer sheet (packing slip) was printed.

The redundant scanning and uploading/downloading required for this process delayed the adjustment of inventory.

Avery Dennison Solution:

With an RF-enabled Monarch® Pathfinder® Ultra® Platinum™ printer, the transfer details are displayed on the screen. After the items are retrieved, they are scanned with the Monarch Ultra Platinum and placed in a carton. A barcoded content label is printed by the Monarch Ultra Platinum and applied to the carton. Because the Monarch Ultra Platinum printer was connected directly to the Retailer's network, the inventory is adjusted immediately.

The Monarch Ultra Platinum printer helped the Retailer reduce steps for their store transfer from 14 to 6 which translated into an annual labor savings of \$154,000.

For more information on how the Monarch Pathfinder Ultra Platinum printer can help you single-handedly improve your productivity, call us at **800.543.6650, prompt 5**. Ask for a free analysis of your business processes and demonstration of the Monarch Pathfinder Ultra Platinum printer.
