

# Monarch® RFID Asset Tracking Solutions

**Monarch®**  
Products and Services

**Companies spend millions of dollars a year, tracking, tracing and replacing lost or misplaced assets.**

Costs are incurred not only for the physical asset, but in lost productivity while the asset is missing and for the time it takes to try to locate it. *Using RFID technology to track and*

*trace assets can save you time and money.*

Many businesses need to track and trace their assets. These assets could be lab equipment used by many personnel or laptop computers, desks, monitors, expensive tools, etc. *Traditional asset tracking is typically performed manually and is time-consuming.*

Even if manual processes are not employed, inventory tracking methods, like bar coding, can still lead to assets getting lost or misplaced. Some companies spend millions of dollars a year replacing assets, not to mention the cost of lost productivity incurred when workers have to try to find the asset or projects are not completed because the right equipment is not available.

**Other challenges for inventory tracking include inventory in multiple locations or asset tracking bar codes located in difficult to reach or hard to see areas on the asset.**

Other businesses manage assets owned by other companies and are subject to audits to ensure the assets are present and in good working order. If the assets are lost, chargebacks can occur. Many companies employ a person dedicated solely to inventory and tracking assets.

## Avery Dennison Can Help You:

- Locate assets with ease
- Streamline audits
- Eliminate replacing lost or misplaced assets
- Reduce inventory process time
- Increase productivity

Complete with the hardware you need, Smart Tags and Smart Label Solution's software, Avery Dennison provides a total solution that will track and trace all your assets with ease, no matter where they're located.

The Monarch RFID Asset Tracking Solution is available for use on a server, or can be loaded on your PDA, so asset information is at your fingertips. All components are backed by the Monarch® Service Group.

For more information on how Avery Dennison can help you track and trace your assets, for a free demonstration of this exciting solution or for a free analysis of your inventory process, call us today at **800.543.6650, prompt 5.**
